

What are you using on your skin?

Many different skin care brands would like you to believe that all of their ingredients are organic. Sadly, this isn't true. But our high-quality, luxurious skincare products are made from 100% certified organic ingredients. Simply stated, these are grown without the use of pesticides, synthetic fertilizers, sewage sludge, genetically modified organisms or ionizing radiation. Products made with organic ingredients are better for your skin because there are no residues of pesticides or solvents to damage your skin. Organic ingredients also contribute towards a healthier environment and sustainable economy.

What makes us different? Not only using extracts, we use actual fruit. Seeds, shavings or zest. We don't skimp. Every product contains one half to one whole organic fruit, providing for a nourishing texture you will not find with any other products. This truly unique, trademark secret is what sets our products apart and delivers beneficial, all-natural beauty results. With that in mind, we carry out our promise by providing you with innovative organic beauty solutions, while maintaining a high commitment to quality. We invite you to try, enjoy and experience products like no other!
